## Extremely Severe Cyclonic Storm “Chapala” Over Arabian Sea To Move

### Chapala To Cross Over Yemen Coast

New Delhi, India, 02.11.2015, 17:07 Time

**USPA NEWS** - The Extremely Severe Cyclonic Storm, called “Chapala” is likely to move further westwards during next 12 hours, then west and north-westwards and cross Yemen coast, south of Riyan as a very severe cyclonic storm around noon tomorrow 3rd November, 2015.

A depression in the Central Arabian Sea had now turned into a Cyclonic storm but moved away from the Indian Coast moving west- and North-westwards initially and then south-westwards over the last four days.

No adverse weather is expected along and off west coast of India because of this climatic condition.
